**WIDE BEAM**  
The Gen5 Elevator's light beam offers a very wide throw along its length. This ensures there is no 'socket shadow' or dark spots between lights.

**ADJUSTABLE**  
Adjustable brackets above allow the Gen5 Elevator to be mounted flat to elevator drop ceiling and pivoted.

**DIMMING**  
Where dimming is required, simply plug an i2Systems LightLink into the i2Systems Power Box and dimming is enabled. See above for model numbers.

**IN-LINE CONNECTOR**  
Each Gen5 Elevator includes a 6 foot cable with an in-line connector 6 inches back from the fixture. The cable is terminated with ferrules that offer simple installation into i2Systems Power Box.

For complete technical information refer to the Gen5 Elevator Installation Guide available at [www.i2Systems.com](http://www.i2Systems.com)
